Foreword

HIS Company enjoys the distinction of being the only seed firm in the United States which makes a general line of flower seeds its exclusive industry.

The business was founded at Arroyo Grande in 1898 by Victor Johansen, who entered the work with a splendid knowledge and experience gained in the culture centers of Europe. From the beginning it has been a unique organization through the active interest of all the members of the family, who have become experts in the work; and since the death of Mr. Johansen the roguing and selecting of stock seed have been done under the personal supervision of Mrs. Johansen and her three sons.

"QUALITY"

is our motto, and no expense nor care is considered too great to produce seeds of the strongest germination, true in every respect, and that will give satisfaction to the most critical trade.

This catalog is presented covering our exclusive lines, and is illustrated from photographs, many of them taken in the field, to show the high standard of the stock. We will furnish electrotypes of the engravings shown at prices as given under each.
